Fruit Is Food — Grow Your Own

JUMBO

Fruit Trees

Big Roots --- Bear Early

**SAVE TWO TO THREE YEARS BY PLANTING NOW
SUPER-SIZE FRUIT TREES HAVING JUMBO GROWTH**

**Best Trees Obtainable—Carefully
Selected—Specimen Trees**

Time is money, therefore, for the additional expense of a few cents per tree you can plant Jumbo size fruit trees and eat the fruit from them surprisingly soon after planting. The Super-Size fruit trees being especially grown as Jumbo Trees, are the strongest growers. They are exceedingly vigorous, very hardy, and produce tremendous crops of fruit. These are ideal trees for the home garden.

YOUR SELECTION—Can be assorted varieties Apples, Peaches, Pears, Plums, Sweet Cherries, Sour Cherries, and Nectarines, consisting of only the varieties as listed on this page.

Jumbo Size—6 to 8 ft., heavily branched—\$1.50 each; 3 for \$4.05; 5 for \$6.00; 10 for \$11.00; 25 for \$20.00; 50 for \$37.50.

THIS SPECIAL OFFER ONLY ON FOLLOWING VARIETIES, SUPER-SELECTED, JUMBO-SIZE TREES:

Varieties are listed in their order of ripening:

**It's easy with Harrison's
Superior, Early-To-Bear
Fruit Trees and Plants.**

**Buying Fruit Trees Is
An Act Of Confidence**

Your future success and profit from your investment depends on factors you cannot see, the skill and experience of the nurserymen, the type of parent tree that is used in propagation, the willingness of the nurserymen to stand back of every one of his claims.

For 58 years the Harrison organization has been supplying fruit trees to an ever widening circle of customers, until today Harrison's Nurseries are the largest growers of fruit trees in the World. This demand we believe is due to the profit producing proven heavy yielding, bud selected strain fruit trees we are producing plus absolute dependability and square dealings. Thousands of reports from enthusiastic customers, hundreds of year in and year out customers are proof that you can **Depend on Harrison's Fruit Trees**. You buy them without risk and with assurance they will yield you the greatest possible profit.

THIS IS OUR LATEST CATALOG

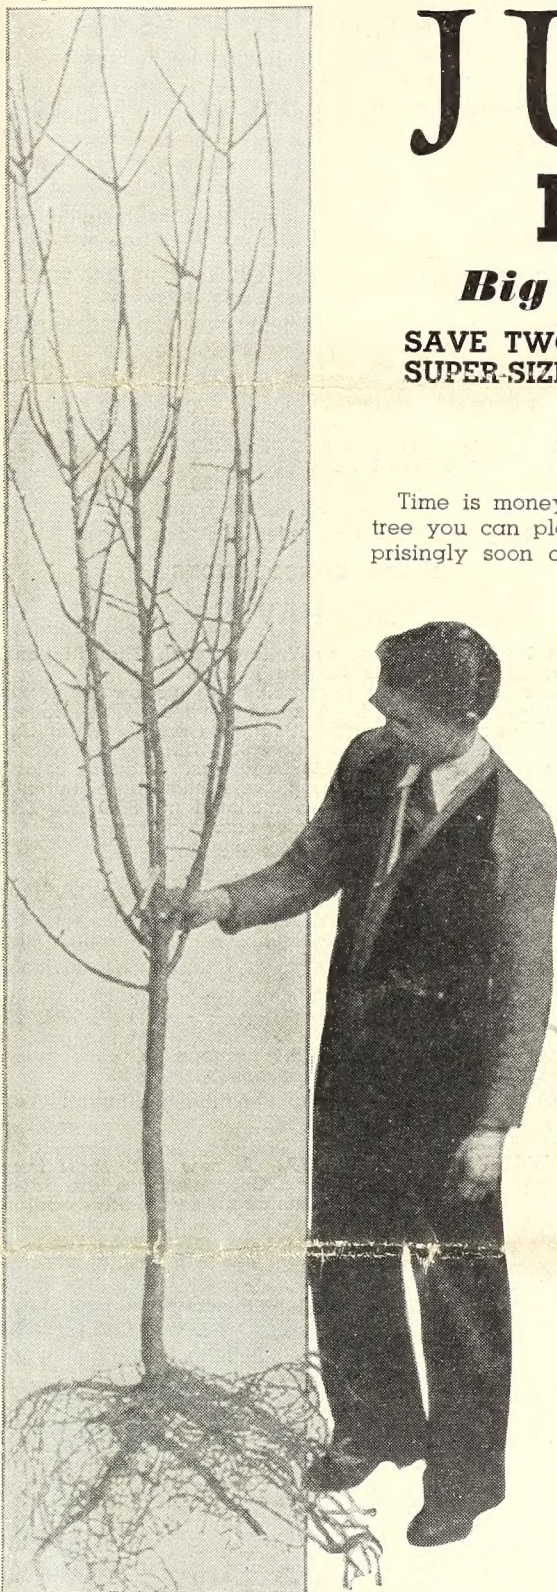

and prices contained herein cancel all previous prices. We will probably issue a large descriptive catalog during March 1943. If interested mail us a postal card and we will put your name on our list. **THANKS.**

Attention Commercial Fruit Growers

This is your last opportunity to get fruit trees in quantity, due to the war. Production in all nurseries has been greatly curtailed which will reflect in a shortage of fruit trees within the near future.

For this planting season Harrison's have one of the finest supplies in America, being a complete list of varieties of true to name Peach, Apple, Pear, Plum, Cherry, Nectarine and Apricot Fruit Trees of the best quality.

If interested in a large quantity, please mail us your complete list of wants.

A Jumbo Size Apple Tree

Planting Seasons

BEST RESULTS are to be attained in planting all types of nursery stock during the time the plants are dormant. Plants are usually in the finest condition for transplanting during November and can be safely transplanted after November first when your soil is in condition for digging anytime during the day. We ship to Southern States all winter. For customers who are unable to plant during November or December then the planting can be satisfactorily made during March, April or early May. Plant just as early in spring as weather permits.

ACRES

From the **PROFIT** ANGLE HARRISONS' "BUD SELECTED"

Peach Trees Are Your Best Bet

Harrisons' Peach trees are the best peach trees you can plant in your orchard. Our superior Berlin climate and soil plus Harrisons' method of propagating, planting, budding, spraying, pruning, digging, grading and packing are what make the fine trees. If we could get you to come to Berlin we could show you all the details. If you cannot come and will send us your order we will stake our reputation on the promise that you will get the very best trees that can be grown.

RELIABLE STANDARD VARIETIES. Worthy Commercial kinds. Equally as good for home and local markets.

Listed in order of ripening.

EARLY ROSE. Very early. Another Favorite Commercial Peach. White, cling, medium large size for an early Peach, high bright red skin, sweet, delicious flavor. Good shipper, making it a new favorite among commercial varieties.

CUMBERLAND. Early. White, semi-freestone.

EARLY HILEY. Early. An earlier maturing strain of Hiley.

ROCHESTER. Early midseason. Yellow, freestone, large, covered with mottled red blush; flesh yellow stained with red at pit, very good quality, prolific bearer. One of the best early midseason yellow freestone peaches for nearby markets, and highly desirable for canning.

FAIR BEAUTY. Early midseason. Yellow, freestone, medium to large size.

SOUTH HAVEN. Early midseason. Yellow, freestone, large, handsome, uniform size, delicate flavor, ripens about 15 to 18 days ahead of Elberta. Tree is very hardy, good grower and a consistent heavy bearer, adapted to cold climates; produces bumper crops in mild climates.

HILEY. Early midseason. Bears huge crops of fancy peaches. White, freestone, medium size, highly red colored and is a very handsome peach of exceptionally good flavor. Tree is strong grower, very healthy and an extra heavy bearer. You can depend on Hiley to bear heavy crops year after year. The marvelous color and wonderful flavor have made it popular on the markets.

EARLY ELBERTA. Early midseason. Yellow, freestone, large, lemon yellow with a dark cast, blush with vivid red. Beautiful appearance, high quality, being somewhat similar to Elberta, although a trifle better flavor, rich golden tender flesh, yet firm and has a delightful flavor; excellent for canning.

BELLE OF GEORGIA. (Belle). Midseason. Large, white freestone, recognized as the best all around white peach. Should be included in every planting. Very hardy and productive.

SHIPPERS LATE RED. Midseason late. Large, round, yellow, freestone; very attractive.

BRACKETT. Midseason late. The fruit is rich yellow with dark carmine cheek. Size is as large or larger than Elberta and much better flavored. Begins to ripen a few days after Elberta.

SALBERTA. Late. Yellow, freestone, large; being a satisfactory cross between Elberta and Salway. Salberta inherited the size, quality and productiveness of Elberta, and inherited the lateness in season of Salway.

HARRISONS' HARDY TREES

We absolutely guarantee Harrison grown fruit trees, variety for variety, to be as hardy or harder than trees grown in any locality north of us.

The Reasons For The Superiority Of Harrison Grown Peach Trees

- 1—Absolutely True To Name
- 2—Healthy—Vigorous
- 3—Disease Free
- 4—Hardy
- 5—Properly hardened off before digging
- 6—Propagated from bearing trees of selected strains

- 7—Come into bearing earlier
- 8—Yield bigger crops of better fruits
- 9—Have larger roots
- 10—Take hold quickly in new locations
- 11—The best trees for less money

TRUE TO NAME

In addition to carefully selecting the propagating wood from bearing trees of superior strains we have also employed the services of Dr. J. K. Shaw, Research Professor of Pomology of Massachusetts State College, Amherst, Mass., and of Dr. W. H. Upshall of the Vineland, Ontario, Canada Experimental Station. These two men are the World's foremost fruit identification specialists and they have pronounced our trees true to name.

NEWER INTRODUCTIONS

RED HAVEN

The New Early Ripening Yellow Peach That Ripples About 10 Days Before Golden Jubilee.

The most promising early ripening yellow freestone peach ever introduced. A cross between Hale Haven and Kalhaven made at the South Haven, Michigan Experimental Station. Brilliant red color with creamy yellow background, smooth skin, almost fuzzless. Reddens before it ripens. Bears heavy crops and should be thinned for best results. Every grower should try RED HAVEN. Supply of trees is limited, order early.

Listed in order of ripening.

JUNE ELBERTA. Very early. Yellow.

EARLY HALE-HAVEN. (U.S. Plant Patent 325). Early, bud sport of Hale-Haven, having same characteristics of fruit, but ripens a week earlier.

TRIOGEM. (N.J. 70). Early, oval, red all over, medium large, yellow, freestone.

SUNHIGH. (N.J. 82). Early, large, red all over, yellow flesh, semi-freestone.

GOLDEN EAST. (N.J. 87). Early midseason, very large, high red color, yellow, freestone.

VALIANT. Early midseason. Seedling of Elberta. Yellow freestone, productive.

SULLIVANS' EARLY ELBERTA. A new bud sport from the world famous Elberta. Characteristics are identical with Elberta, but ripens about seven days earlier. Looks like it will be one of the standard varieties for commercial planting. Every grower should try this new strain. Trees are priced same as standard varieties.

THE BEST SIX PEACH VARIETIES

PROFITABLE — DEPENDABLE — ADAPTABLE

Listed in order of ripening.

RED BIRD CLING. Very early. White, cling, extra large with a bright red blush, the first peach of large size to ripen; the greatest very early money maker.

GOLDEN JUBILEE. Early. The Supreme Early Yellow Peach. Commercial peach orchardists for a century have been looking for an early peach of high quality, fine flavor, yellow, freestone, attractive color and firm texture and eventually they have found it in the marvelous Golden Jubilee. This variety is a sensation of recent introduction of new varieties and is by far better than any early variety of commercial importance which has been introduced in many years. It ripens about four days ahead of Carman.

HALE HAVEN. Early midseason. Ripens just after Golden Jubilee has been harvested and about 14 days ahead of Elberta. Yellow freestone, large, high red color, firm, fine flavored. It takes on red color early and the peaches show good red color several days before ripening which gives it a distinct advantage for marketing. When allowed to ripen fully upon the trees its flavor is undoubtedly the best of any yellow peach. Tree is an extra strong grower and produces a bumper crop of fruit each season. Very hardy in fruit bud. One of its parents is J. H. Hale, from which it inherits its large size and fine color. The other parent is South Haven from which it attains hardiness, large crops yearly and strong growth. It is the best variety ripening between Golden Jubilee and Elberta and should be planted in every orchard.

J. H. HALE. Midseason. Extra large size. Yellow freestone, extra large, beautiful red coloring, firm and of the highest quality and enticing flavor. J. H. Hale ripens about two or three days prior to Elberta. We offer original strain trees.

ELBERTA. Midseason. The Greatest and Best Money-Making Peach. Yellow, freestone. Fruit is large to extra large; golden yellow with brilliant shades of red; firm, juicy, rich, sweet and good flavor. Elberta has the greatest international reputation of any peach. It has been the standard for all other peaches almost since the date of its introduction. The coloring of Elberta is practically perfect. The rich, yellow skin is almost entirely covered with dark red blush upon the sunny side. The attractive appearance and the uniform large size serve to sell it almost on sight. We offer original strain trees which is the best strain obtainable.

RIO OSO GEM. For description and price see page 3.

OLDER VARIETIES—Suitable for planting in certain sections. Also ideally adapted for home use and local markets. Listed in order of ripening.

MAYFLOWER. Very early; earliest of any variety. White, cling, small size with red all over.

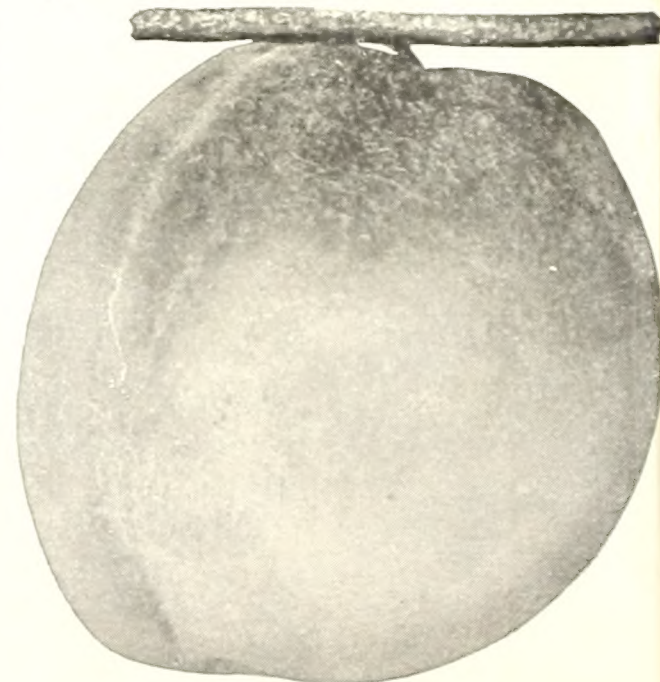

GREENSBORO. Very early. White, freestone, hardy, big crops.

CARMAN. Early. Semi-freestone, medium size, white.

CHAMPION. Early midseason. White, freestone, very large, creamy white with red cheek, sweet, juicy; very high flavor.

SALWEY. Very late. Yellow, freestone.

KRUMMELS (Krummels Late October). Very late. Yellow, freestone, round, fine flavor.

ELBERTA—Standard Peach of the world.

AMERICA'S LARGEST GROWERS OF PEACH TREES

New! Exclusive! Sensational!

The Worlds Largest Peach

RIO OSO GEM

COMMERCIALLY TESTED

**America's
Highest Price Peach
Plant Now**

The Late Ripening Peach You Have Been Waiting For

The Rio Oso Gem is a perfect freestone, form is globular, slightly elongated, of extremely large size averaging in diameter from 2 3/4 to 3 1/4 inches, deep yellow flesh, very fine grain, firm texture, with very excellent flavor, being rich, juicy, sweet and slightly spicy. The coloring is unique, being a beautiful dark crimson-red, running out to lighter crimson and into a rich mottle of crimson over the orange-yellow ground color. It is a good transcontinental shipper.

Bears Heavier Than Elberta

Rio Oso Gem is an extremely heavy bearer and on account of its prolific set of fruit, it is necessary to practice extremely heavy thinning. It has hardy, vigorous fruit buds, which insure it being a heavy annual bearer. The tree bears young.

Ripens Two Weeks Later Than Elberta

The Rio Oso Gem would be a peach of commercial importance when ripening at any time during the peach season, but it is very fortunate that it ripens two weeks later than Elberta, which puts it at a time when there is no other variety of commercial importance as a competitor, and fills a long looked-for gap in commercial production, ripening when the markets are clamoring for peaches.

Colors Before It Ripens

An amazing feature of the Rio Oso Gem is, it will take on a good bright red color and yellow background two weeks before ripening, and even ten days before actual ripening time the percentage of bright red color is decidedly more than most other varieties. When Rio Oso Gem is ready to pick and ship it has practically a solid red color. There is no other peach known that carries such a high percentage of red color on the fruit as this marvelous Rio Oso Gem.

Expert Fruit Growers Say O. K.

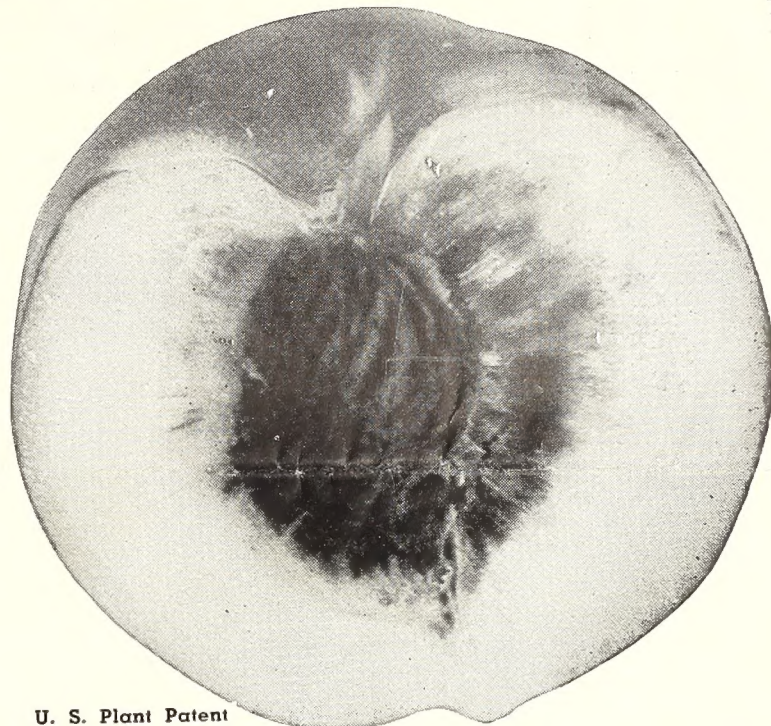

Rio Oso Gem has now fruited in practically every peach district of the Union. Veteran peach growers of the nation are loud in their praise of this startling variety. Rio Oso Gem has passed the experimental stage and proven an outstanding commercial variety superseding the famous Elberta of the Victorian era.

New Earlier Coloring Solid Red Strain Apples

Super-Red Bud Sports Will Revolutionize Apple Growing

Ten Reasons Why You Should Plant Harrisons Distinctly New Strains of Red Apples

- 1—SUPER COLORED BUD SPORTS FROM THE STANDARD VARIETIES.
- 2—SAME AS PARENT IN FLAVOR—QUALITY—PRODUCTIVENESS.
- 3—COLORS WEEKS EARLIER.
- 4—PRODUCES HIGHEST PERCENTAGE FANCY FRUIT.
- 5—TESTS SHOW THEY COME INTO BEARING SOONER.
- 6—BETTER SHIPPING AND STORAGE QUALITIES.
- 7—COMPLETELY TESTED.
- 8—EXCELLED BY NO OTHER RED BUD SPORTS.
- 9—NO INCREASE IN PRICE OVER STANDARD VARIETIES.
- 10—GREATEST PROFITS.

WE CAN SUPPLY THE FOLLOWING NEW SUPER RED BUD SPORTS

BRIGHT-RED-JONATHAN. Growers who are making a good profit with common Jonathan can almost double their profits with this new red strain.

CHERRY-RED STAYMAN. The ever popular Stayman Winesap has produced many bud sports. This Cherry Red Stayman is darker in color than our Scarlet Red Stayman, but it is lighter in color than Dark Red Stayman.

DOUBLE-RED-BALDWIN. Although the common Baldwin is being gradually replaced by other varieties this double Red Strain will bring new profits to the grower of Baldwins.

DARK-RED-STAYMAN. Almost black in color, starts coloring extremely early. Otherwise characteristics same as Stayman Winesap.

EARLY-RED-DUCHESS. Highly colored early apples bring premium prices, this bud sport colors red all over early in the season.

NEW-RED-SPY. Bright Scarlet Red. Coloring weeks before Northern Spy.

RED GRAVENSTEIN. Much better color than the original Gravenstein. Has practically replaced the old strain of well known Gravenstein.

RED-ROME-BEAUTY. By far the best red strain of Rome Beauty obtainable. Has that Bright Scarlet Red Color that is universally popular with the consumers.

RED-SUMMER-RAMBO. A new earlier coloring solid red strains means much greater profits for growers everywhere.

SCARLET-RED-STAYMAN. Bright Red Color weeks earlier. Has all the best qualities of the other strains of Stayman. Its 100% red color will demand premium prices on the markets.

RED-YORKING: Will eventually replace the famous York Imperial. Colors 3 to 5 weeks ahead of its parent.

SOLID-RED-WINESAP. Old Winesap has good color but this new strain produces a still higher percentage of extra fancy fruit.

SUPER-RED-MCINTOSH. An improvement on our already famous strain of McIntosh Red. Color is slightly darker and commences to color weeks earlier.

TRIPLE-RED-DELICIOUS. The king of all Red Apples. Solid Bright Red Color month earlier than the original Red Delicious. Has all the fine qualities of famous parent strain. Plant Harrisons' Triple Red Delicious to insure your future financial income.

Harrisons' Triple-Red Delicious The King of All Red Apples

This apple was introduced by us several seasons ago and since its introduction has been bought and fruited by the tens of thousands by the leading fruit growers throughout the country. It is a "bud sport" of unusually superior merits, being **triple-red** colored and the earliest red coloring strain known.

Reasons for planting this remarkable apple:

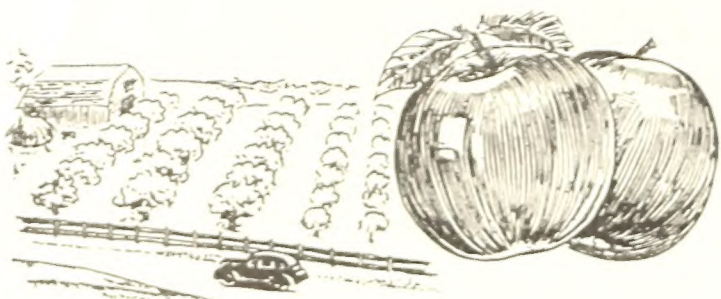

1. Most Profitable Apple Grown.
2. Succeeds Nearly Everywhere.
3. Bears Young.
4. Rich Flavor.
5. Large Size.
6. Earlier Coloring.
7. Triple-Red Color.
8. Attractive Shape.
9. Big Crops.
10. Good Keeper.
11. Easily Grown.
12. More Extra Fancy Fruit.

Apple Growing pays profits

BUT in order to get these profits, it is necessary to start with the best trees and the most desirable varieties. Harrison's Nurseries have been, and are still growing, at Berlin, Maryland, the finest and best apple trees of superior merits it is possible to produce. Harrison-grown apple trees are propagated on whole-root stock, insuring an unusually large root system which is the basis of plant growth. Our apple trees are scientifically budded and grafted from selected heavy bearing strain trees of the variety desired, using the bud selection system. Today we believe that we have more of the improved and best strains of apples in our nursery than any other nursery concern in America. Do not allow a few cents per tree to keep you from buying Harrison-grown apple trees, being the finest and by far the best quality produced on the North American Continent.

Prices on Harrison's High Quality Apple Trees—All Varieties

Harrison's APPLE Trees FOR THE FRUIT INDUSTRY

CERTIFIED—100% HEALTHY TREES

NEW VARIETIES OF RECENT INTRODUCTION

SUMMER APPLES

ANOKA. Striped red. Bears when extra young.
CARLTON. Resembles Red Astrachan. Desirable.
CLOSE. New tested U.S.D.A. No. 57 variety. Ripens with or slightly ahead of Yellow Transparent. Early red apple, good cropper.
Crimson Beauty (Red Bird). A very early red apple.
EARLY MCINTOSH. Red, attractive, good size, flesh white, fine, tender, juicy. Tree vigorous, hardy, healthy and productive.
LARGE TRANSPARENT (Lodi). An improved Yellow Transparent, large, fruits earlier in the season.
MELBA. A seedling of McIntosh. Good size, early.
MILTON. Fruit a beautiful pinkish red with tender, crisp, white flesh of excellent flavor.

AUTUMN APPLES

KEETOSH. A seedling of McIntosh. Canadian origin.
KENDALL. McIntosh seedling. Same season as McIntosh, but keeps longer.
LOBO. Similar to McIntosh but colors earlier.
ORLEANS. Delicious type, bears early.

WINTER APPLES

GALLIA BEAUTY. A Rome Beauty type of apple identical in every respect, except in earlier coloring qualities.
MACOUN. Similar quality and texture as McIntosh, but ripens later.
MEDINA. Delicious type, slightly larger, recommended for trial where Delicious grows too small.
NEWFANE. Delicious type, large size, attractive red color.
SWEET DELICIOUS. Very sweet in flavor. Delicious type.
TURLEY. Seedling of Winesap. Fruit rounded conical in shape, much larger than Winesap, smoother skinned and deeper and richer color; juicy and rich flavor.

BUY YOUR TREES FROM A DEPENDABLE SOURCE

- A—Our organization has over 58 years experience.
- B—Every step in growing under the personal supervision of the Harrison brothers.
- C—One hundred thousand trees in our own orchards from which our propagating plants are selected.
- D—Use of modern methods for planting, cultivating and digging.
- E—Over 5000 acres of various types of soil.
- F—Ideal soil and climatic conditions.
- G—Cooperation with leading horticulturists and experiment stations all over the world.

HARRISON'S OFFER THE GREATEST SELECTION OF DEPENDABLE APPLE VARIETIES IN AMERICA.

SUMMER APPLES

DUCHESSE (Duchess of Oldenburg). Large, red striped.
EARLY HARVEST. Medium size, yellow.
RED JUNE (Carolina). Medium size, red.
SPITZENBURG. Deep red.
STARR. Large, yellowish, smooth skin.
SUMMER RAMBO. Large, splashed with red.
SWEET BOUGH. Pale yellow, large, tender, sweet.
WILLIAMS EARLY RED. Medium to large size, bright rich red; flesh crisp, tender, juicy, sub-acid, good quality.
WILSON RED JUNE. Fairly large, red.
YELLOW TRANSPARENT. Medium size, greenish yellow, very heavy bearer. Most widely planted yellow early variety.

AUTUMN APPLES

FAMEUSE (Snow). Pure white flesh, very good.
GRAVENSTEIN. Large, streaked and splashed with red.
GRIMES GOLDEN. Medium size, yellow, heavy bearer, excellent flavor. Most popular sort for home plantings. Also an ideal pollinizer for Stayman Winesap and many other varieties.
JEFFERIES. Tender, excellent quality.
JONATHAN. Medium to large, red, juicy. Good keeper and an excellent shipper.
KING DAVID. Very dark red, medium size.
KINNARD. Large, dark red, very juicy.
MCINTOSH RED. Medium large size, generally considered highest and best flavored apple grown. Splendid appearance which sells it on sight.
MAGNUM BONUM. Red, popular in South.
MAIDENS BLUSH. Large, red blush.
NORTHWESTERN GREENING. Very large, greenish-yellow, good shipper. Popular for baking.
SMOKEHOUSE. Large, yellow-green mottled with dull red. Fine flavor.
WEALTHY. Medium to large size fruits, hardy, bears regularly.
YELLOW DELICIOUS. Golden yellow apple with decided "Delicious" characteristics. Yellow Delicious has a remarkably good flavor and is most popular for eating during fall and winter months.

WINTER APPLES

ALBEMARLE PIPPIN (Yellow Newton). Large, round ribbed and somewhat irregular.
ARKANSAS BLACK. Dark red. Good keeper.

NUT TREES

Are Ornamental and Profitable

PAPER SHELL PECAN. Medium to large nuts; oblong thin shell, rich flavor. Good grower. The best type Pecan grown. 2 to 3 feet, \$1.50 each; 2 for \$2.50.
BLACK WALNUT (juglans nigra). Rapid growth, spreading branches, large, globose nuts, prolific bearer. 1½ to 2 ft., 75c each; 2 for \$1.25; 10 for \$5.00.
ENGLISH WALNUT (juglans Regia). Thin shelled, large, delicious nuts, producing heavy crops and demanding good prices. Most popular Walnut grown. 2 to 3 ft., \$1.75 each; 2 for \$3.00.

QUINCE

ORANGE. Late, large, bright yellow, excellent flavor, productive and rarely fails to produce a crop. Best canning variety. We offer the Wayne County (New York) strain. 4 to 5 feet \$1.25 each; 10 for \$10.00.

FIG

BROWN TURKEY. Medium to large size; copper-brown skin, flesh white. Not hardy North. 2 to 3 ft., \$1.00 each; 10 for \$7.50.

NEW BOYSENBERRY

No. 1 Grade—Selected Plants

25c each; 2 for 40c; 5 for 60c; 12 for \$1.40; 25 for \$2.20; 50 for \$3.70; 100 for \$6.50; 200 for \$12.00; 300 for \$16.20; 400 for \$19.10; 500 for \$21.30; 1000 for \$40.00.

Harrisons' Cherry • Pear • Apricot • Nectarines • Plums

For Commercial and Home Plantings

BARTLETT PEARS

HARRISON GROWN PEAR TREES

BUDDED ON BLIGHT RESISTANT ROOTS

BARTLETT. Large, rich golden-yellow, with a light red blush when ripe; buttery, juicy, melting, with a very rich, pleasing flavor. Bartlett is without a peer, having won an international reputation as the best and the most profitable commercial pear and also the finest home-orchard variety. Early.

BEURRE BOSC. Large size, fine quality, brings highest market price. Late.

BEURRE D'ANJOU. Large, green in color, somewhat yellow when ripe, buttery, melting, rich vinous, good flavor. Tree vigorous, hardy, prolific bearer. Very late.

CAYUGA. Flesh is firm and fine texture quite to the center and possesses a delectable flavor. New.

CLAPPS FAVORITE. Large size, hardy and very productive. Thrives where other varieties fail. Very early.

DOUGLAS. Very resistant to blight. A winter pear of wonderful quality, golden yellow with a faint blush on the cheek. Bears early.

DUCHESSE. Very large, dull greenish-yellow. Tree somewhat dwarf but a dependable bearer. Late.

EWART. Large size and good quality. Greenish yellow netted with russet, and has a fine, melting, tender, juicy flesh. New.

GARBER. Large, clear yellow, heavy bearer. Fine market variety; unsurpassed for preserves.

GORHAM. Flavor is sweet and vinous with a very marked and pleasing aroma. Flesh is white, tender, buttery and juicy. Valuable for dessert and canning. New.

KIEFFER. Fruit large, skin yellow with light vermillion cheek. Most popular canning pear. Late.

KOONCE. One of the earliest pears, free from blight, does not rot at the core like many early pears. Fruit is yellow, medium to large, delightful flavor. Very productive.

PHELPS. Flesh is tender and juicy with a pleasant vinous flavor. New.

PULTENEY. New variety originated by the New York Experimental Station. Fruit is of the Bartlett type, a little more regular in outline, skin smoother.

SECKEL. A beautiful and delicious little pear. One of the richest and highest flavored pears grown. Tree dwarf, bears prolific crops. Late.

SHELDON. Medium size, flesh slightly coarse, melting, juicy, late.

WAITE. New, outstanding, high quality. Very resistant to blight. Late.

WILLARD. Yellowish, juicy. Late.

WINTER NELIS. A sweet rich pear for winter use. The trees are not very vigorous but are adapted to most soils and are productive. For home and market.

WORDEN SECKEL. A seedling of Seckel. Superior in size and color. Midseason.

HARRISON GROWN PLUM TREES

AMERICA'S BEST VARIETIES

This is an expert selection made from hundreds and hundreds of known varieties of plums, which we have fruited, thus selecting only the super-strain varieties, which are suitable for all purposes. You can depend on Harrison-Grown Plum trees, being hardy and producing bumper crops each year.

EARLY TO BEAR

ABUNDANCE. Early, large, lemon-yellow, hardy, productive.

AMERICAN MIRABELLE. Midseason. New variety. Medium size fruit, sweet Yellow Damson.

BRADSHAW. Midseason, large, dark violet-red, juicy, excellent flavor. Desirable for canning.

BURBANK. Midseason, large cherry-red, high quality, very productive. Popular commercial variety.

FELLENBERG PRUNE (Italian). Late, medium size, freestone, dark purple, delicious. Fine for drying.

FORMOSA. Early. Large oval fruit, cherry-red, sweet flavor, resembling the Apricot.

GRAND DUKE. Late. Commercial variety, purplish-black, juicy, sweet, excellent for cooking.

GERMAN PRUNE. Late, large, dark purple, sweet. Good for canning and drying.

LOMBARD. Midseason. Medium size, showy, purplish-red fruit, excellent quality for canning, cooking, preserving or spicing. Prolific cropper.

RED JUNE. Very early, medium size, deep vermillion-red; good.

SANTA ROSA. Large size, firm, flavor, good eating qualities, reddish in color.

SHIRO (Early Gold). Early. Fruit is very large, golden yellow, semi-transparent, covered with bright scarlet-red blush.

SHROPSHIRE DAMSON. Late, medium size, dark purple. Very productive. The best for preserving. The popular old-fashioned Damson variety.

STANLEY. Midseason. Freestone, large, new prune variety, outstanding characteristics. Considered best for cooking and fresh fruits.

SUPERIOR. Large size, red, firm flesh, delicious quality.

UNDERWOOD. Very large beautiful red color. Delicious quality.

WICKSON. Midseason, extra large size, color dark red, thin bloom, flesh amber-yellow, firm, sweet.

YELLOW EGG. Late. Large, golden yellow. Good for cooking. Largest and handsomest of yellow plums.

APRICOTS

The apricot is one of the most delightfully luscious fruits grown, when eaten fully ripe and fresh from the tree. It is remarkable that such a rich and beautiful, golden, sweet fruit is not planted more, especially since it ripens just after the early cherries and before the best early peaches.

ALEXANDER. Early, prolific, freestone, orange with red blush; very juicy and sweet flavor. A large prolific bearer that will withstand adverse weather conditions. This variety deserves greater popularity.

EARLY GOLDEN. Small, pale orange, juicy and sweet. It is a hardy, prolific bearer; ripens first of July.

SUPERB. Medium size, light salmon-colored fruit; hardy.

WENATCHEE MOORPARK. An improved strain of Moorpark.

NECTARINES

DELICIOUS FOR EATING

GOLD MINE. White flesh, large, attractive, freestone.

HUNTER. Large, round, yellow, freestone.

QUETTA. Large, greenish white, splashed with red, white flesh, cling. Prominent new variety.

SURE CHOP. Very vigorous and productive. The fruits are large, roundish, white and overlaid with very attractive red. Very pleasing flavor.

Harrison Grown Sour Cherry Trees

Budded from bearing commercial orchards of superior strains. All cherries are budded on hardy grown, whole root seedlings, which, in our most favorable soil, form a large, fibrous, well proportioned root system, which is exceedingly important for the proper growth of cherries. Highest quality at most attractive prices.

DYEHOUSE. Ripens a week ahead of Early Richmond. The earliest good sour cherry.

EARLY RICHMOND. Exceedingly hardy and productive.

ENGLISH MORELLO. Large, blackish-red cherry. Hardy and productive. Very late.

MAY DUKE. Very early, productive, an old time favorite.

MONTMORENCY (Large Montmorency). Midseason, sour large, sound and red, slightly acid; flesh is very tender and of unusually good quality, being by far the best variety of sour cherry grown. The best shipper of all sour, which with its wonderful carrying ability for long distance shipments, along with its handsome appetizing appearance and large size, has made Montmorency in a class by itself, always commanding the highest market prices.

OLIVET. Large, deep red, glossy cherry with rich vinous sub-allo flavor. Morello type. Midseason.

RICHMORENCY. A Montmorency type that ripens a week or more earlier than Large Montmorency. Produces heavy crops and the size of the fruit is large.

ROYAL DUKE. Sour, dark red, fair quality. Early.

Harrison Grown Sweet Cherry Trees

What fruit is more pleasing than the sweet cherry? The ideal fruit to plant in the back yard. We have a good supply of first-class trees in the following varieties:

BING. Very large dark brown, flesh firm, sweet. Midseason.

BLACK TARTARIAN. Very large, sweet, purplish-black color, juicy, rich flavor, heavy bearer and most profitable sweet variety grown. Early.

EARLY RIVERS. Early, medium size, crimson-black, excellent quality.

EMPEROR FRANCIS. Very similar to Napoleon, but ripens 2 to 3 days earlier.

GIANT. A late variety. Tree is large, vigorous and productive.

GOLDEN WAX. Large, yellow, fine flavor. Bears bumper crops. Easily grown. Midseason.

GOVERNOR WOOD. Large, light yellow, marked with red, sweet flavor.

LAMBERT. Extra large, sweet, jet black, very popular. Midseason.

NAPOLEON (Royal Anne). Large, pale yellow, bright red cheek, sweet, excellent flavor, prolific bearer. Midseason.

SENECA. Resembles Black Tartarian, but ripens two weeks earlier, rich sweet flavor.

SCHMIDT (Schmidt's Bigarreau). Large, sweet, deep black, tender, fine flavor. Midseason.

VICTOR. Large, light colored and excellent quality. Tree is large and productive.

WINDSOR. Large, sweet, almost black, fine quality. Valuable late variety.

YELLOW SPANISH. Large, sweet, yellow with red tinge. One of the most beautiful and popular of the light colored cherries. Heavy bearer. Midseason.

Evergreens For Year Around Beauty

UPRIGHT EVERGREENS

IRISH JUNIPER. Forms a narrow and dense column, compact, bluish-green foliage. Most attractive when planted around the foundation of a home, at corners and entrances. Widely used in formal gardens.

	Each	2 for	10 for
1 to 1½ feet	\$1.75	\$3.00	\$13.00
1½ to 2 feet	2.30	4.00	19.00
2 to 3 feet	3.00	5.00	22.00
3 to 4 feet	4.00	7.00	27.00

PYRAMIDAL ARBORVITAE (*Thuja occidentalis pyramidalis*). A really beautiful evergreen that should be included in every planting. It grows tall and narrow, requires no trimming and retains its bright green color throughout the whole year. A pair of them placed at the entrance or at the corner of a house makes a superb showing.

	Each	2 for	10 for
1½ to 2 feet	\$2.80	\$4.80	\$21.00
2 to 3 feet	3.50	6.30	29.00
3 to 4 feet	4.50	8.00	35.00

PLUME-LIKE RETINOSPORA. A handsome evergreen from the Orient with feathery foliage. Upright grower, broad at base, excellent for foundation plantings. We offer it in green or golden foliage.

VEITCH'S RETINOSPORA (*Retinospora squarrosa veitchii*). Foliage silvery blue, feathery and dense, giving soft wooly appearance. Broad pyramidal outline. One of the best Retinosporas.

Prices for the above varieties	Each	2 for	10 for
12 to 15 inches	\$1.75	\$3.00	\$13.00
15 to 18 inches	2.30	4.00	19.00
18 to 24 inches	3.00	5.00	22.00

SPREADING EVERGREENS

SPREADING YEW (*Taxus cuspidata*). The beautiful yew of moderate bushy growth, the upright spreading branches densely clothed with short leaves of dull green. Hardest of all yews, grows in semi-shady locations.

SPREADING ENGLISH YEW (*Taxus Baccata Repandens*). Low spreading, dwarf grower, with dark glossy green foliage.

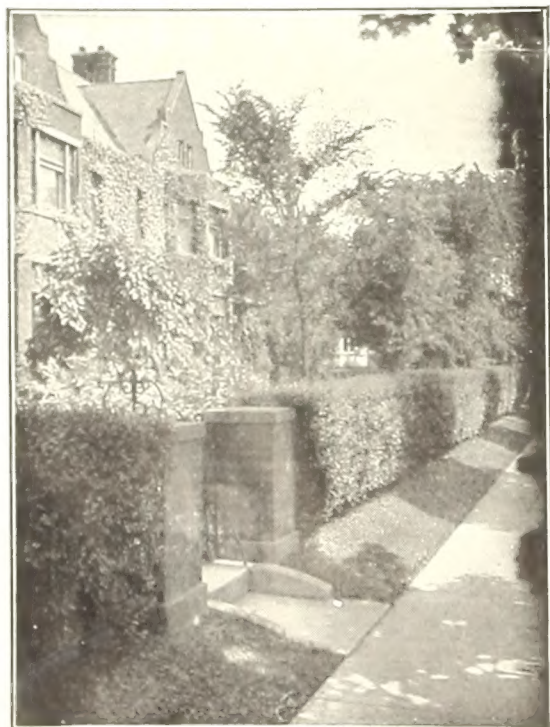

Prices for the above varieties	Each	2 for	10 for
12 to 15 inches	\$2.50	\$4.40	\$20.00
15 to 18 inches	3.30	6.00	27.00

DWARF YEW (*Taxus cuspidata nana*). An excellent dwarf form of Yew with fine spreading branches and rich deep green short leaves. Highly recommended.

	Each	2 for	10 for
10 to 12 inches	\$2.50	\$4.40	\$20.00

SAVIN JUNIPER. Spreading vase shaped growth. One of the most attractive spreading evergreens.

	Each	2 for	10 for
12 to 15 inches	\$1.75	\$3.00	\$13.00
15 to 18 inches	2.30	4.00	19.00

California Privet Hedge

HICK'S YEW (*Taxus media hicksii*). A narrow columnar growing form. Dark green leaves. Fast grower

UPRIGHT ENGLISH YEW (*Taxus baccata capitata*). Upright grower, dense, green foliage. Makes a most attractive specimen plant when fully matured.

Prices for the above varieties	Each	2 for	10 for
12 to 15 inches	\$1.75	\$3.00	\$13.00
15 to 18 inches	2.30	4.00	19.00
18 to 24 inches	3.15	5.25	23.00

IRISH YEW (*Taxus baccata hibernica*). This evergreen is the aristocratic member of the Yew family. It grows tall and narrow with stout, crowded branches and spirally arranged leaves which are dark green in color. Fortunately, we have some specimen plants in our nurseries from which we are able to propagate.

	Each	2 for	10 for
12 to 15 inches	\$2.00	\$3.80	\$17.00
15 to 18 inches	2.40	4.40	20.00
18 to 24 inches	3.15	5.25	23.00
2 to 2½ feet	3.75	6.75	30.00
2½ to 3 feet	5.00	9.00	40.00
3 to 4 feet	6.50	12.00	55.00

BERKMAN'S GOLDEN ARBORVITAE (*Biota aurea nana*). Dwarf, compact, roundish shape, golden yellow foliage.

SPINY GREEK JUNIPER. Upright columnar habit and bluish-green foliage. The growth is so slow that the tree is well adapted for foundation plantings and other situations requiring dwarf trees.

Prices for the above varieties	Each	2 for	10 for
12 to 15 inches	\$2.40	\$4.40	\$21.00
15 to 18 inches	3.20	5.80	26.00

COMPACT GLOBULAR ARBORVITAE (*Thuja occidentalis compacta*). Natural compact, globe-shape, dark green foliage. The ideal low-growing plant for massing against the taller evergreens in foundation plantings.

	Each	2 for	10 for
12 to 15 inches	\$2.20	\$3.80	\$17.00
15 to 18 inches	2.90	5.00	22.00

They retain their attractive foliage all winter.

GREEN EUONYMUS 1½ to 2 ft.	2.00	3.60	15.00

Hedges Make Beautiful Living Fences

CALIFORNIA PRIVET (*Ligustrum ovalifolium*). We grow California Privet by the mile. Most popular hedge plant; can be trimmed to any desired shape. For planting long hedges, this is the most economical variety. Quick grower.

AMUR RIVER NORTH PRIVET (*Ligustrum amurense*). Hardest of the family with handsome olive green foliage. Best hedge plant for severe climates.

IBOLIM PRIVET (*Ligustrum ibolium*). A cross between California and Ibolim Privet with beauty of the former and hardness of the latter.

Prices for above varieties	1 to 9 plants	10 to 49 plants	50 to 300 plants
Prices per each plant			
8 to 12 inches	\$0.12	\$0.09	\$0.05
1 to 1½ feet	.15	.12	.07
1½ to 2 feet	.18	.15	.10
2 to 3 feet	.25	.20	.15
3 to 4 feet	.35	.26	.20

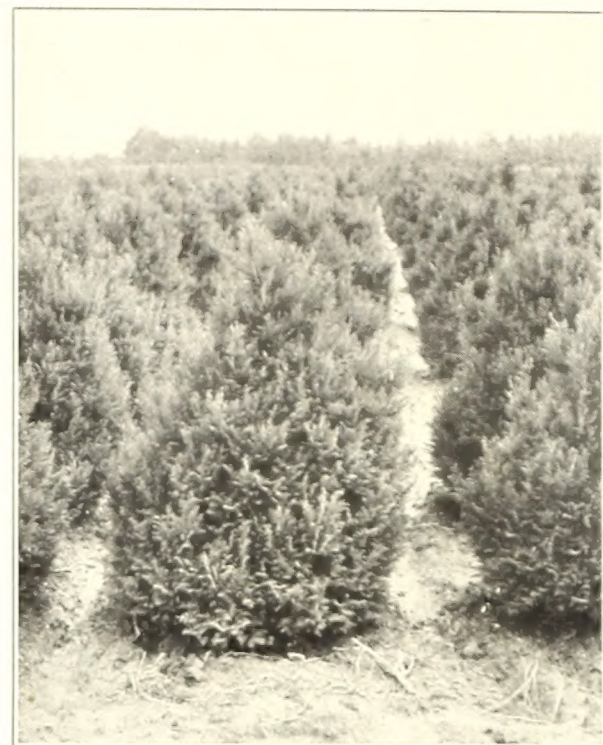

GREEN BARBERRY (*Berberis thunbergii*). The best low dense hedge plant grown. Its abundant, small light green leaves, which turn to rich colors in autumn, and its wealth of scarlet berries make it very attractive. Extremely hardy and requires but little pruning. Ornamental and graceful the whole year.

Prices for above varieties	1 to 9 plants	10 to 49 plants	50 to 300 plants
Prices per each plant			
9 to 12 inches	\$0.15	\$0.12	\$0.09
12 to 15 inches	.20	.16	.12
15 to 18 inches	.30	.25	.20
18 to 24 inches	.45	.35	.25

RED-LEAVED BARBERRY (*Berberis thunbergii atropurpurea*). A highly important introduction among shrubs, giving us for the first time a practical, easily grown shrub of medium height, with good, distinctly red foliage. This must prove a boon to all types of landscaping, where studied contrasts are to be worked out with the shrub foliage depended on for colors.

UPRIGHT BARBERRY. Very similar to Green Barberry except it grows upright, can be trimmed to any desired height.

Prices of Red Leaved and Upright Barberry	1 to 9 plants	10 to 49 plants	50 to 300 plants
9 to 12 inches	\$0.20	\$0.16	\$0.12
12 to 15 inches	.30	.25	.20
15 to 18 inches	.40	.35	.25
18 to 24 inches	.50	.45	.30

Plume-like Retinospora

AZALEAS

AZALEA HINODEGIRI. Deep carmine blooms, evergreen foliage. The most desirable kind. Spreading dwarf type grower.

	Each	2 for	10 for
4 to 6 inch spread B&B	\$0.60	\$1.10	\$4.50
6 to 8 inch spread B&B	1.00	1.90	8.00
8 to 10 inch spread B&B	1.40	2.60	12.00

AZALEA AMOENA. Rose-purple flowers, blooms in early spring and retains its foliage all year.

	Each	2 for	10 for
12 to 15 inches	\$2.00	\$3.40	\$15.00
15 to 18 inches	2.50	4.30	20.00
18 to 24 inches	3.00	5.20	24.00

BOXWOOD

DWARF ENGLISH BOXWOOD (*Buxus sempervirens suffruticosa*). A widely known and popular form of dwarf boxwood. It has small, deep green, dense leaves which hold their bright color throughout the winter months. Suitable for low hedges and edgings. Can be trimmed in various forms.

	Each	2 for	10 for
3 to 4 inches	\$0.35	\$0.60	\$2.50
4 to 6 inches	.50	.90	4.50
6 to 8 inches	.75	1.40	6.50

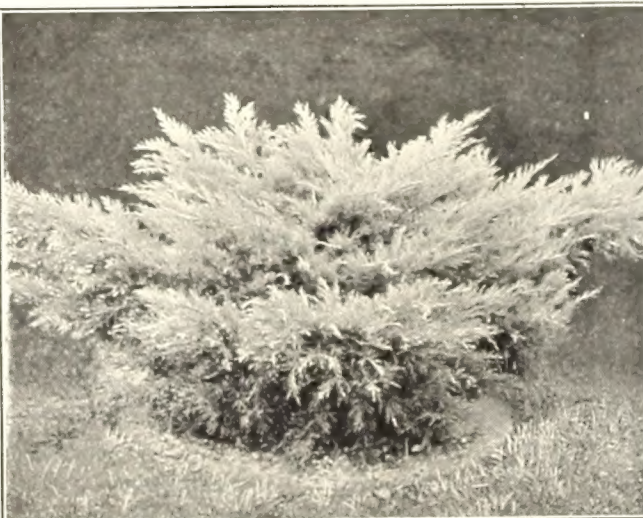

AMERICAN BOXWOOD (*Buxus sempervirens*). Hand some shrubs of dense, compact growth. Leaves evergreen, quite small, deep glossy green. An ideal plant, more extensively used for shaping in various forms than possibly any other evergreen.

	Each	2 for	10 for
3 to 4 inches	\$0.35	\$0.60	\$2.50
4 to 6 inches	.45	.80	3.50
6 to 8 inches	.60	1.10	5.00
8 to 10 inches B&B	.80	1.50	7.00
10 to 12 inches B&B	1.10	2.10	10.00
12 to 15 inches B&B	1.50	2.90	14.00
15 to 18 inches B&B	2.00	3.80	18.00
18 to 21 inches B&B	2.75	5.00	22.50

GORGEOUS PEONIES

Flowers that rival the rose. Once planted they last for years. There should be several planted in every yard. Their large bright colored flowers during May and June furnish an abundance of flowers for the home.

SPECIAL OFFER: 6 large 3 to 5 eye roots for only \$1.95, postpaid.

Savin Juniper

Harrisons' Ornamental Shade Trees

They Give Immediate Results

SHADE TREES

AMERICAN ELM (*Ulmus americana*). A noble native tree of great size, wide spreading, graceful curving branches, growing up to a form like the outline of long stemmed flowers in a tall vase. The handsomest American tree for lawns, avenues and parks.

ORIENTAL PLANE (*Platanus orientalis*). A rapid, upright, clean growing tree, long lived, beautiful dense foliage. It is very hardy and not affected by insects.

SILVER MAPLES (*Acer dasycarpum*). Tall, stately tree, rapid grower, graceful, leaves silvery underneath.

Prices for the above varieties:	Each	2 for	10 for
6 to 8 ft., 1 to 1 1/4 in. cal.	\$1.75	\$3.25	\$12.50
8 to 10 ft., 1 1/4 to 1 1/2 in. cal.	2.50	4.50	17.50
10 to 12 ft., 1 1/2 to 1 3/4 in. cal.	3.25	5.50	25.00
12 to 14 ft., 1 3/4 to 2 in. cal.	4.00	7.00	32.50

Can supply larger caliper sizes—write for prices on larger quantities.

LOMBARDY POPLAR (*Populus nigra italica*). A tall, spirelike tree used for screens and formal plantings. It is fast growing, distinctly ornamental and beautiful.

	Each	2 for	10 for
5 to 6 ft.	\$1.00	\$1.60	\$6.00
6 to 8 ft.	1.50	2.50	10.00

DWARF BLOODLEAF MAPLE. Very dwarf, graceful, red foliage. Exceedingly popular.

18 to 24 inch	3.30 each; 2 for 6.00
---------------	-----------------------

LIFETIME SHRUBS

CREPE MYRTLE (*Lagerstroemia indica*). Small, green, glossy leaves; very beautiful showy flowers during midsummer to fall; noticeable object in any landscape. Not hardy north of Mason-Dixon line, but most popular southern shrub. Pink and red varieties. State color desired.

	Each	2 for	10 for
1 1/2 to 2 feet	\$1.20	\$2.10	\$9.00

HYDRANGEA PEE GEE (*Hydrangea paniculata grandiflora*). Large flowers; first snowy white, then pink changing to reddish bronze in the fall. Blooms midsummer to fall.

	Each	2 for	10 for
18 to 24 inch	\$0.50	\$0.90	\$4.00

HYDRANGEA, PINK OR BLUE (*Hydrangea otoksa*). Old favorite southern hydrangea. When winters are severe we suggest heeling in. Large balls of pink or blue flowers; very attractive large leaves. Color depends on acidity of soil.

Field grown plants \$0.80 each; 2 for \$1.50

SNOWBALL. Clusters of pure white flowers in May and June. Good as a specimen plant. A very desirable shrub.

1 1/2 to 2 feet	\$0.90 each; 2 for \$1.60
-----------------	---------------------------

SPIREA VAN HOUTTEI. The most popular shrub. It is valuable as a specimen in groups, in border planting and for hedges. The branches are slender, drooping, covered with white flowers in April or early May. It grows 6 to 8 feet and is unsurpassed in gracefulness and beauty. See illustration below.

	Each	3 for	10 for
1 to 1 1/2 feet	\$0.25	\$0.65	\$1.50
1 1/2 to 2 feet	.30	.75	2.00
2 to 3 feet	.35	1.00	2.50

SPIREA ANTHONY WATERER. Crimson flowers in large, flat clusters. Blooms early and continues till fall.

12 to 15 inch	\$0.45 each; 2 for \$0.80
---------------	---------------------------

WEIGELA EVA RATHKE. Very attractive deep carmine-red flowers, making a very showy shrub.

1 1/2 to 2 feet	\$0.60 each; 2 for \$1.00
2 to 3 feet	.80 each; 2 for 1.40

WHITE LILAC. Old fashioned type lilac, vigorous bloomer.

1 1/2 to 2 feet	\$1.00 each; 2 for \$1.85
-----------------	---------------------------

CHINESE ELM (*Ulmus pumila*). This tree is of recent introduction in this country. It is a very rapid grower.

PIN OAK (*Quercus palustris*). The daintiest and most graceful of the oaks, with deeply cut, bright, fresh green foliage; beautiful autumn effect. A very graceful tree for the lawn and fine for streets and roadsides.

SWEET GUM (*Liquidambar styraciflua*). A shapely tree with slender, corky-ridged branches. Leaves are bright green and lustrous; in autumn they change to a pleasing tone of crimson color.

NORWAY MAPLES (*Acer platanoides*). Most popular and best known shade tree. Green foliage remains until late fall and turns rich yellow.

Prices for the above varieties:	Each	2 for	10 for
6 to 8 ft., 1 to 1 1/4 in. cal.	\$2.25	\$4.00	\$17.50
8 to 10 ft., 1 1/4 to 1 1/2 in. cal.	3.25	5.50	22.50
10 to 12 ft., 1 1/2 to 1 3/4 in. cal.	4.25	7.50	30.00
12 to 14 ft., 1 3/4 to 2 in. cal.	5.25	9.00	40.00

BABYLON WEeping WILLOW (*Salix babylonica*). A rapid growing, hardy tree, thriving in any moist soil. The willows are valuable and interesting subjects on account of their graceful aspect.

GOLDEN BARK WEeping WILLOW. Similar in habit and growth of the Babylon Weeping Willow, except the bark is of golden color, making a showy effect in the winter time.

Prices of the above Willows:	Each	2 for	10 for
5 to 6 ft.	\$1.50	\$2.50	\$10.00
6 to 8 ft.	2.25	4.00	17.50

DISTINCTIVE SHRUBS

THEY MAKE A COLORFUL PLANTING.

Prices of all shrubs in this column.

	Each	3 for	10 for
Medium, 1 to 1 1/2 feet	\$0.35	\$0.90	\$2.50
Big, 1 1/2 to 2 feet	.40	1.05	3.00
Largest, 2 to 3 feet	.50	1.35	4.00

ALTHEA or ROSE OF SHARON (*Hibiscus syriacus*). The double and single flowers are formed in varying colors. We can supply single red, double red, white with crimson center and single white.

Buddleia Magnifica. New and undoubtedly the finest of all the summer-flowering Butterfly Bushes. Large bright lavender panicles. Flowers do not sunburn as do other varieties. Foliage heavy rich dark green. Very hardy.

DEUTZIA, PRIDE OF ROCHESTER. Double white flowers, slightly tinged with rose, appear in mid-June.

DOGWOOD, RED-BRANCHED (*Cornus alba sibirica*). Bright red bark, white flowers, blue fruit; rapid grower, beautiful winter effect.

GOLDEN BELL (*Forsythia*). Vigorous, upright grower; profusion of yellow flowers in April. One of the best early blooming shrubs.

HONEYSUCKLE BUSH (*Lonicera morrowi*). Early white flowers in June, followed by red berries.

QUINCE FLOWERING (*Cydonia japonica*). Scarlet flowers in April and May. No doubt one of the most attractive spring blooming shrubs.

SPIRAEA BILLIARDI. A hardy type of Spiraea that grows exceedingly well in dry places. Long, fluffy flower spikes. We offer two colors: white and pink.

SYRINGA, SWEET MOCK ORANGE or GARLAND (*Philadelphus coronarius*). Of upright habit, and produces in June a wealth of white, fragrant flowers.

SWEET SCENTED SHRUB (*Calycanthus floridus*). Hardy native with many double, chocolate colored flowers in May. Flowers, leaves and even the wood have a spicy fragrance.

TAMARIX, GALICA. Light pink blossoms in May and June. Bluish green foliage.

TAMARIX, AMURENSE. Slender branches covered with pink flowers. Grey-green foliage.

TAMARIX, AFRICAN (*Tamarix africana*). Feathery gray-green foliage, very showy.

TARTARIAN HONEYSUCKLE (*Lonicera tatarica*). Very attractive in blossom, producing an abundance of flowers followed by red fruit. We offer pink and white varieties.

WEIGELA, PINK (*Weigela rosea*). The most popular Weigela sold today. Its delicate pink, bell-shaped flowers are borne in great profusion along arching branches.

Silver Maple

FLOWERING TREES

BECHTEL'S FLOWERING CRAB APPLE. Only genuine double-flowered Crab. When in bloom, appears to be covered with delicate pink, perfectly double small roses of delicate fragrance. Best flowering crab apple.

PINK FLOWERING ALMOND. A lovely dwarf flowering shrub. Profusion of double pink blooms during early spring.

Prices for the above varieties:	Each	2 for
1 1/2 to 2 ft.	\$0.60	\$1.10
2 to 3 ft.	.80	1.40
3 to 4 ft.	1.10	2.00

FLOWERING CHERRY. Double white. A handsome variety that flowers profusely in the spring.

PURPLE-LEAVED OTHELLO PLUM. Upright grower, foliage brilliant reddish purple, holding its color throughout season. Prolific bearer, with crimson fruit producing ornamental effect.

Prices for the above varieties	Each	2 for
2 to 3 ft.	\$0.70	\$1.20
3 to 4 ft.	.90	1.60
4 to 5 ft.	1.25	2.20

FLOWERING PEACH. Very beautiful, large, double blooms in the springtime. The ideal low-priced flowering tree. We can supply the flowering Peach in three colors; white, red and pink.

WEeping FLOWERING PEACH. A beautiful red flowering peach that has a decided weeping effect. This peach has bloom and weeping characteristics somewhat similar to the Weeping Cherry.

Prices for the above varieties	Each	2 for
2 to 3 ft.	\$0.50	\$0.90
3 to 4 ft.	.70	1.20
4 to 5 ft.	.90	1.60

RED FLOWERING DOGWOOD (*Cornus florida rubra*). One of the most popular small ornamental trees. Handsome red flowers in early spring. Makes an attractive lawn specimen.

	Each	2 for
1 1/2 to 2 ft.	\$1.40	\$2.50
2 to 3 ft.	1.80	3.30

WHITE FLOWERING DOGWOOD (*Cornus florida*). One of the native spring flowering small trees, with white flowers and bright red berries in fall.

	Each	2 for
2 to 3 feet	\$1.00	\$1.80
3 to 4 feet	1.50	2.70
4 to 5 feet	2.00	3.50
5 to 6 feet	2.75	5.00

HARDY VINES

SPURGE (*Pachysandra terminalis*). An evergreen ground cover. Will grow in dense shade; suitable for planting beneath trees where grass will not grow.

	Each	2 for	10 for
Strong plants	\$0.30	\$0.45	\$2.00

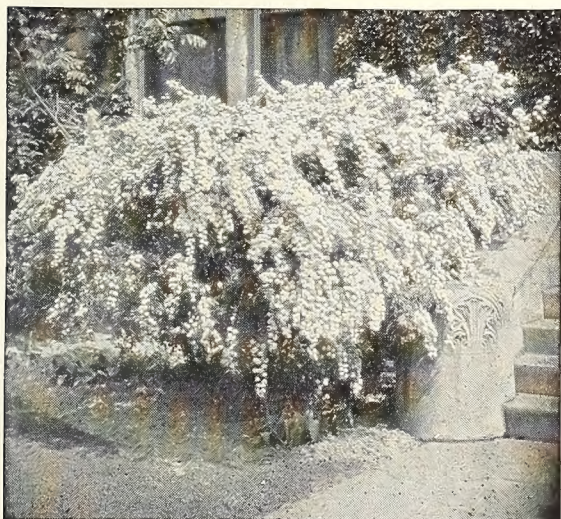

CHINESE WISTERIA. A rampant growing, clinging vine. Blue flowers in large drooping clusters during May and June. 60c each, 2 for \$1.10, 10 for \$5.00.

ENGLISH IVY (*Hedera Helix*). The most popular evergreen vine; large, deep green, glossy foliage. Excellent for covering walls. Useful for shady locations. 50c each, 2 for 90c, 10 for \$4.00.

HALL'S HONEYSUCKLE. Dark, glossy green foliage; fragrant flowers from July to fall. 50c each, 2 for 90c, 10 for \$4.00.

YELLOW JASMINE (*Jasmine nudiflorum*). A shrub-type vine, deep golden yellow flowers in early spring.

2 yr. plants	\$0.60 each; 2 for \$1.10

MONEY BACK. In the event that any nursery stock sold by us should prove untrue to name under which it is sold, we hereby agree, on proper proof of such untruthfulness to name to replace the original order or to refund the purchase price. Except for such liability, and in respect to all nursery stock sold by us, we give no warranty, express or implied, as to description, quality, productiveness or any other matter.

—HARRISONS' NURSERIES, INC.

Our Guarantee

Every customer is assured of Harrisons' Hi-Quality Trees and Plants at all times. Expert growing on proper soils, careful digging and packing is Harrisons' policy on every order. Every tree and plant we ship is guaranteed to be strictly first class, free from injurious diseases and insects and to reach you in good condition.

Anytime trees or plants are received that do not meet these standards they will be replaced free of charge or your money refunded.

Continued growth depends on soil, weather conditions, planting and after care. After ten days it is mutually understood that the nursery stock is satisfactory, however, we will replace nursery stock that dies from unavoidable causes at half price, if notified within six months after its arrival.

Blueberries

HARDY — ORNAMENTAL

DESCRIPTION OF VARIETIES LISTED IN ORDER OF RIPENING

CABOT. Plants seldom exceed three feet in height and make a broad low bush. The color of the new growth in winter is a light red over olive. The large berries have a delicious sub-acid flavor.

RANCOCAS. The bush of slender, vigorous, upright habit rarely surpasses five feet in height. The winter twigs are a dark red. The berries are somewhat larger than those of Rubel and begin to ripen several days earlier.

CONCORD. The bush is of upright habit and at maturity exceeds six feet in height. The young growth is bright red in winter. The berries are large, frequently reaching three-quarters of an inch in diameter. They usually ripen a few days earlier than Rubel and are fine in flavor and appearance.

RUBEL. A vigorous, productive variety. Well developed bushes stand six feet high and the winter color of the young wood is a rich red. The large berries of fine color are usually ready to pick the first week in July. Best commercial variety.

JERSEY. The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over golden brown. The berries are the largest of any here listed, light blue and ripen about the same time as Rubel.

Everblooming Varieties—Hybrid Teas.

AMI QUINARD. Very dark crimson maroon.

CONDESA DE SASTAGO. Coppery red and yellow. One of the most deliciously fragrant varieties. Keeps well when cut for indoor enjoyment.

EDITH NELLIE PERKINS. Exquisite two toned pink. Always in bloom.

ETOILE DE HOLLANDE. Bright red; fragrant.

GOLDEN DAWN. Pale yellow. Lovely dark green holly like foliage. The lemon yellow blooms are very large.

KAISERINE AUGUSTE VICTORIA. Creamy buds which develop into absolutely perfect blooms of dazzling snow-white, tinted slightly with lemon-yellow at center.

MRS. CHAS. BELL. Shell-pink, free bloomer; very fragrant. Should be in every garden.

Harrison' Grown

Mary Washington

Asparagus Crowns

Heavy Pedigreed Strain Crowns

We have made a specialty of growing asparagus roots for over 50 years and have supplied plants for some of the finest asparagus beds in the country. The growing, handling, and shipping of millions of asparagus roots has taught us many things and today we are in position to supply you with quality roots at low cost. All our crowns were grown from the original strain of seed.

RUST RESISTANT—PROFITABLE

Growers everywhere are discarding all other varieties in favor of the famous Mary Washington, because it is earlier, the stalks are larger, more tender and more productive than any other variety and more highly immune to rust, which means that one planting will produce profitable crops for many years.
